

YouTube Playlist Sorter

YouTube Playlist Sorter enhances YouTube's "**Save to...**" playlist dialog, making it faster and easier to organize large collections of playlists.

Whether you have a handful of playlists or hundreds, the extension helps you find the right one quickly without endless scrolling.

Features

A complete overview of all available features can be found in **FEATURES.md**.

Highlights include:

- Pin and organize your favorite playlists.
 - Sort playlists A→Z or Z→A.
 - Search playlists as you type.
 - Automatically scroll to playlists that already contain the current video.
 - Draggable, resizable playlist dialog.
 - Configurable theme color and dialog size.
 - Support for localized (non-English) YouTube interfaces.
-

Installation

Chrome Web Store

The recommended installation method is through the Chrome Web Store.

Beta Versions

The latest beta versions are available from the project page:

<https://www.psychomix.org/YouTube-Playlist-Sorter>

Beta versions usually contain support for the latest YouTube interface changes and upcoming features before they are released to the Chrome Web Store.

Developer Installation

1. Download the extension.
 2. Open `chrome://extensions`.
 3. Enable **Developer mode**.
 4. Click **Load unpacked**.
 5. Select the extension folder.
-

Configuration

Open the extension's **Options** page to configure:

- Enable or disable playlist sorting.
- Default sorting mode.

- Pinned playlists.
- Theme color.
- Dialog size (width and height).
- Debug logging.

Pinned playlists can be entered as a JSON array or as one playlist title per line.

Example:

```
[  
  "<title>Travel</title>",  
  "Madeira",  
  "Azores",  
  "<line>",  
  "<title>Watch Later</title>",  
  "Watch later (2026)",  
  "Watch later (2025)"  
]
```

Special entries:

- `<title>...</title>` inserts a colored section heading.
- `<line>` (or `<hr>`) inserts a visual separator.

Privacy

YouTube Playlist Sorter does **not** collect, transmit or share any personal information.

All settings are stored using Chrome's `storage` API and remain on your computer (or are synchronized by Chrome if Sync is enabled).

The extension:

- does not send data to external servers,
- does not contain analytics,
- does not display advertisements,
- does not track user activity.

Permissions

The extension requires a single permission:

- **storage** — used to save your configuration and preferences.

No additional permissions are required.

Compatibility

Supported browsers include:

- Google Chrome
- Microsoft Edge
- Brave
- Opera

- Other Chromium-based browsers

The extension runs on:

https://www.youtube.com/*

Support

If YouTube changes its interface and something stops working, please let me know.

Bug reports, suggestions and feature requests are always welcome.
